

PROVIDING STYLE, SUBSTANCE & SECURITY

uPVC Windows can transform your home with a number of performance and maintenance benefits. Discover the potential with TriCraft uPVC today!

About US

Established in 2004, we present ourselves as one of the renowned names in fabrication of glazing activities. Keeping in mind the technological up-gradation and with an ever growing and esthetic need of architects for beautiful elevations we have been turning the dreams of architects into reality and becoming the one stop shop for varied requirements. Over the years we have grown due to our sincerity and assured quality and services in architectural product ranging from doors, windows to providing glazing and cladding solutions.

uPVC Doors and Windows

Amalgamating creativity, aesthetics and sustainability coupled with the foresightedness of originators and innovators, TriCraft brings forth its range of UPVC doors and windows conformed to the stringent international benchmarks. A rare combination of strength and durability that can withstand a wide range of temperatures with exquisite style places.

uPVC Features

- ✦ High weather resistance
- ✦ High UV stability
- ✦ High impact resistance
- ✦ High thermal stability
- ✦ Fire Resistance
- ✦ Corrosion resistance
- ✦ Heat Resistance
- ✦ Controls water vapour flow
- ✦ Controls condensation
- ✦ Maintenance Free
- ✦ Controls solar and other radiation
- ✦ Controls sound transmission
- ✦ Prevents forced entry
- ✦ Provides strength and rigidity
- ✦ Asthetic Appeal
- ✦ Controls rain and snow penetration

- ✦ Eco-Friendly
- ✦ Recycleable

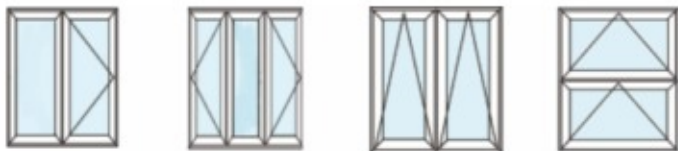

uPVC Types of Windows and Doors

CASEMENT WINDOWS

Opening inwards or outwards, with the help of a sash that is fixed on the outer frame, Casement Windows have certain uses where others may not come in use. Rational and Efficient, designed to complement your home, no matter what the style be; these are the most popular in the uPVC window categories. Tough material used to make these windows maintenance-free.

SLIDING WINDOWS

There are two window frames that slide horizontally on tracks from left or right. The door panels are specially designed for maximum viewing area, and strength to withstand daily use. Mainly are used for big size partition door solution or big windows in rigorous surroundings.

SLIDE & FOLD WINDOWS

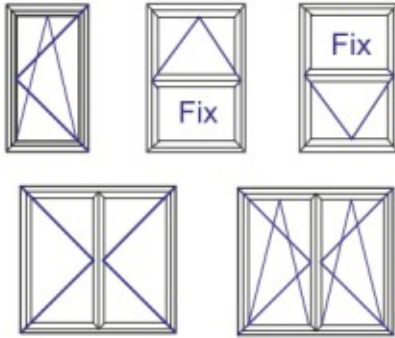

The Slide N Fold doors system provide superior operating performance and smooth integration into any architectural style and space. The door systems are engineered using superior hinge and locking systems that are reliable and secure.

The rollers along which the doors slide, offer a smooth glide and reliable performance with solid design and expert engineering.

TILT & TURN WINDOWS

Tilt N Turn provides maximum design freedom due the large opening sizes that can be achieved and suits any window replacement program or building type in the construction industry. The system is designed for the production of inward opening windows that provide a tilt option for secure ventilation and that accept a full range of hardware in-line with latest European standards used, and meeting all the latest product testing standards.

TILT 'N' SLIDING DOORS

Tilt N Slide doors offer the ultimate protection for your home. Following the European perception of tilting and sliding the door sash, our doors permit the functionality of a dual compression seal, which provides outstanding insulation from both dust and noise while giving the utmost ventilation and glass expanse. The doors keep your living space secure and grant privacy as well.

GRILL WINDOWS 'N' DOORS

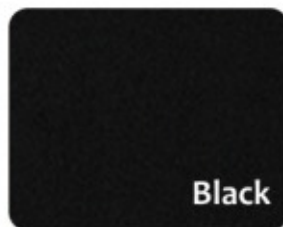

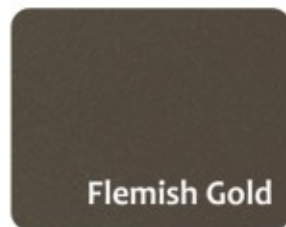

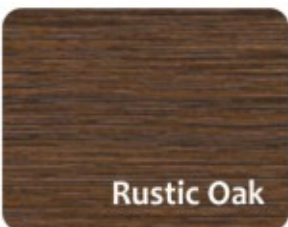

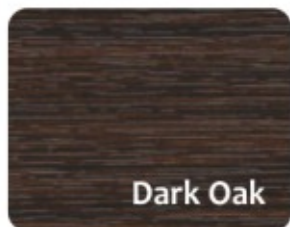

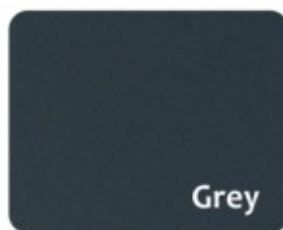

A combination of style, substance and security. TriCraft Grill Windows provide a twin sash, a bug mesh and a grill built into the system. The windows are crafted specifically for Indian conditions to protect you from insects and theft without sacrificing ventilation, while providing all the standard benefits of a casement window, making it a complete solution for Indian homes.

- ✦ Fusion welded frame and corners ensure strength
- ✦ Multi-point locking system for total security

WIDE RANGE OF COLORS

TriCraft's high-quality profiles, embellished with appropriate glazing obtain the optimum results through sophisticated multi chambered profile technology that reduce transmission of heat.

The highly efficacious sealing system raises the insulating performance of the framed product, preventing 'leakage' of air. Thermal insulation implies that in summer, loss of cool air from the interior is slightest and in winters the warm air is trapped inside, effectively maintaining room temperature, and reducing power consumption.

Comparison between Wood, Aluminium & uPVC

Window Type	Wooden	Aluminium	TriCraft uPVC Windows
Cost	High Cost	Low to Mid Cost	Suits all Budget Low to High
Maintenance	Maintenance Intensive	Not Maintainable	Virtually Maintenance Free
Corrosion	Termite & Rot Attacks	Corrosive	No Corrosion or Termite Attack
Weather Proofing	Leaks & Droughts	Leaks, Droughts & Wind Rattle	No Leaks, No Droughts, No Rattle, Self-Draining
Sound Proofing	Average Subject to Wind Noise	Poor Subject to all Noises	Excellent Sound Proofing
Thermal Efficiency	Excellent	Poor	Excellent Thermal Efficiency
Ease of Operation	Difficult if not Maintained	Not Smooth	Smooth/ Easy Gliding Action
Insect Screen	Optional	Optional or Included	Included with Sliding Many Options
Warranty	None	None	10 Years
Termites/Worms/Fungus	Affected by Termites extreme un-repairable damages to wood	Affected by Fungi	No Harm
Water Resistance	Water causes extreme un-repairable to wood	80% - 92%	95% - 100%
Installation	Complicated-using Lugs	Simple Anchor Fasteners	Simple Anchor Fasteners
Sound Insulation	Poor	Good	Excellent
